^a 1995 total represents total releases to air, water, land, and off-site transfer.

^b Lead was below the threshold reporting value for 1994.

^c On June 30, 1995, EPA changed the EPCRA 313 implementing regulations to require reporting only for aerosol forms of sulfuric acid. The CY 1994 TRI database has been modified to withdraw sulfuric acid reports for the ORR.
