

Table 4.5. ORNL nonradiological airborne emissions, 1995

Chemical	Quantity released		Major release source	Basis of estimate
	lb	kg		
Particulates	16,953	7,706	Stack emission	Engineering calculations based on emission factors
SO _x	2,440,718	1,093,053	Stack emission	Engineering calculations based on emission factors
Carbon monoxide	138,972	63,169	Stack emission	Engineering calculations based on emission factors
Volatile organic compounds	2,053	933	Stack emission	Engineering calculations based on emission factors
NO _x	440,758	200,344	Stack emission	Engineering calculations based on emission factors
